

Sage-grouse, grazing, and fire project				
	Excellent	Good	Fair	Poor
Introduction				
Briefly describe: <ul style="list-style-type: none"> <li>Background to sage-grouse life cycle and habitat needs</li> <li>Background information specific to your research questions (could be related to grazing, time since fire, burn severity, etc.)</li> <li>Research question, your specific objectives</li> <li>What results do you expect</li> </ul>				
Methods				
Should include: <ul style="list-style-type: none"> <li>Study area</li> <li>Source and type of data used in your analysis</li> <li>Your analysis methods, including scale of analysis</li> </ul>				
Results				
Should include: <ul style="list-style-type: none"> <li>State your results as they relate to your research question(s)</li> <li>Figures and tables with figure texts and table headings</li> </ul> <p>Make sure that the results are accessible and that you provide a narrative to guide the reader through the important findings.</p>				
Discussion				
Should include: <ul style="list-style-type: none"> <li>Compare your results to the expectation you stated in the introduction</li> <li>Compare your results to what other researchers have found. Search for literature references in Web of Science and Google Scholar for example.</li> <li>Conclusions and management implications</li> <li>What are some limitations of your analysis, including limitations of and assumptions made within the data products you used?</li> <li>Future direction</li> </ul>				
<b>Technical writing:</b>				
Report is logically and effectively organized, results can easily be understood by reader				
Writing is clear and concise with correct spelling and sentence construction, jargon and/or slang are not used				
Scientific names are included (when appropriate) and spelled correctly				
Tables and figures are included, they are consistent and have the correct format				
Metric units are consistently used				
<b>Multiple literature citations (&gt;3) should be used to support the interpretations in the Introduction and Discussion.</b> Citations are consistent, correctly formatted, and properly referenced				
<b>General:</b>				
Assignment is submitted in a single document	YES	NO		
Assignment instructions are followed				
My overall summary of your assignment
